Relevant areas of study:

Graphic Design

Branding & Visual Identity

Digital Design

Website Design

Typography & Layout

Marketing & Visual Communication

DESIGN PROJECTS

Brand Identity & Promotional Design — Academic Projects

Developed original branding concepts and visual identities for school projects.

Created logos, colour palettes, typography systems, and supporting brand materials.

Applied principles of layout, hierarchy, typography, and composition to create cohesive visual designs.

Designed promotional materials with consideration for target audiences and brand communication.

Website & Digital Design — Academic Projects

Created website design concepts focused on clear navigation, visual hierarchy, and user experience.

Developed digital layouts and visual assets using Adobe design software.

Adapted design concepts across different digital formats while maintaining consistent branding.

Personal & Creative Design Projects

Explored branding, graphic design, and visual communication through independent creative projects.

Developed design concepts from initial ideas through final visual execution.

Experimented with typography, imagery, composition, and different visual styles.

PORTFOLIO

Graphic Design Portfolio: Available upon request

A **portfolio is especially important** for a graphic-design application. Your next step should

be to put 4–6 of your strongest BCIT projects into a simple portfolio and link it at the top of

your resume.

If you show me your **school projects/images**, I can also help you choose which ones belong in the portfolio and write the **project descriptions for each one**.
